

Project Profile

Trinity Mills Crossing | Carrollton, TX

SRG Roofing is pleased to announce the successful completion of its fluid applied roofing project on the Trinity Mills Crossing Shopping Center located in Carrollton, TX. This property had an existing aluminum fiber roof coating installed that was well past its lifespan. SRG Roofing was contracted to furnish and apply a two-part acrylic fluid applied roofing system on both buildings in the shopping center. SRG Roofing applied 43,000 square feet of ASC-X two-part acrylic fluid applied roof membrane, which was manufactured by American Standard Coatings. SRG Roofing is an Approved Applicator for American Standard Coatings and was able to provide the client with a 20-year full system warranty that covers both labor and material defects. If you have a similar project and would like for SRG Roofing to provide you with a quote, please visit www.srgroofing.com or call us 855.860.3732.
